CHALLENGES

Manual processes and Siloed Data Repositories to manage the end-to-end GRC/IRM program

HOW WE CAN HELP

→ Perform program assessments to determine the current program maturity
→ Provide fit-for-purpose solutions to automate and centralize the GRC/IRM program using Archer's eGRC platform

---

Limited on-going maintenance and support for keeping up with the new features and functionality

→ Provide the On-going Admin maintenance and support
→ Enhance existing Archer implementations to use latest functionality and features
→ Perform a system health check to identify opportunities for cost savings

---

Keeping up with the constantly changing regulations and developments in eGRC platform features

→ We keep abreast with new features and functionality being released
→ Develop innovative solutions to meet regulatory needs
→ Provide plug & play add-ons to further enhance and optimize your Archer implementations

---

CLIENT SUCCESS STORIES

Client Name:

$60 Billion North American Energy Infrastructure Company with Four Strategic Business Units on One IRM Platform

Project:

Supporting the client to design and deploy enterprise IRM use cases on IRM Platform since 2014. Enabled four strategic independent business units on a single IRM Platform instance. Successfully implemented 14 parallel workstreams over a period of 1 year

Benefits:

Integrated single IRM platform, Improved process efficiencies, customer experience, user adoption and increased business value thru centralized risk management

Client Name:

$100 Billion Bank and Wealth Management Company

Project:

Define and Deploy Enterprise Risk Management strategic roadmap to further mature and automate 20+ processes spanning enterprise risk, compliance, information security, third party management, and BSA/AML

Benefits:

Improved process efficiencies, increased Program visibility and holistic view of enterprise risk posture
